

## After the Session

### *How soon after the event are the proofs ready for viewing?*

A sneak preview will be published on our website within one week after the shooting. The final proofing of the photos takes 4 to 6 weeks.

### *Do you offer online proofs? How do I select the images I want?*

We don't offer online proofs in the classical sense. All the images in the final gallery will be edited and available to you. Going through a high number of images can be actually quite challenging and we consider it a part of our job to make sure you get the best of the best photos in the final collection.

### *Do you offer online viewing?*

Yes, all our packages come with an easy to access online gallery (password will be supplied to you) so you can view and share your images with friends and family. The gallery will be available for a minimum of one year after publication.

### *How long does it take until my final gallery is available for viewing?*

Smaller portrait sessions take about 2-3 weeks until it will be possible to view them online, weddings 4-8 weeks. If your package also includes prints or albums, this can take a little bit longer. We know how excited you are to see the final images, so we do our best to provide you with the final product as soon as possible.

### *Can I see some of my pictures right away?*

Yes! For clients who would like to see a small sampling of their photos within the first few days we offer a "sneak peek" that can be viewed on our Social Media pages. If you want to share your sneak peek with friends and family you can do so by sharing the post straight to your own page.

### *Can you just email me a few images?*

A lot of work goes into the images after the actual session is done, and it sounds easier to "just send a few images" than it actually is. If possible we try to provide a sneak peek on social media, but otherwise concentrate very hard to provide you with your images in the promised time frame.

### *Do you backup your images? How can we be sure our images won't get lost?*

In our editing process we ensure that we have multiple copies of your images at all time. We'll also store your images for a minimum of one year, but please make sure you store them in a safe place as well so you don't lose them. Printing the final images is of course the best way to preserve them, but we also recommend multiple copies in safe places.

### *What if I lose my flash drive?*

In the case that your flash drive becomes damaged or lost, it can be replaced at a \$50 charge. However, we highly recommend that you make backups of your images so you preserve them.
